BRIDGEWATER MIDDLE SCHOOL AUDITORIUM SEATING REPLACEMENT
Opening October 1, 2021 at 10 AM
ADDENDA NO. 1

Question:
Relating to DCAMM Certification. If not a general contractor, then dismiss this section.

Question:
Relating to CAL 117 and CAL 133. Since the auditorium does not receive any sunlight, the need to be fade resistant (UV protected) is not necessary. However, the District does want the seating to meet fire safety and fire testing as required by the Bridgewater Fire Department and Fire Codes.

Question:
Relating to floor lighting. The District will take care of the floor lighting. This is not an expectation for the successful vendor.

Question:
Relating to dumpster placement and access to building. There is an area off the main drive where a dumpster can be placed. There is access to the building through the entrance next to the large parking lot.

Question:
Relating to the absence of drawings. A pre-bid conference was held and at that time, as well as written in the bid specification, it is noted that the drawings would be the responsibility of the successful vendor.
