G. RFP for Autism Program Enhancement Services

Ms. Lubomski presented the need for the staff to receive intensive one-on-one training for students with complex needs. Ms. Lubomski stated that this training would be a one-time cost. This model would allow our existing staff and Special Education Department staff the ability to train other staff members working in these programs.
H. IT Model 2017-18

Ms. Clemons proposed moving the IT services from private vendors to in house. Documentation was provided regarding what this model would look like and the cost savings comparison to outsourcing these services.

School Capacity Presentation (School Capacity Committee)

Mr. Vegaro reported that Migeon Avenue could be moved. There is room at THS for the central office. A capacity report will be sent to the full board via email with specific information for each building. There is capacity to close any elementary school. It takes about 18 months for redistricting. The next step is to decide if a grade level model or neighborhood model is best. There was also discussion regarding moving the 8th grade to the High School and the 5th grade to the Middle School. This will be investigated further. Ms. Richardson questioned the logistics of how the 8th grade would work at THS rather than just the numbers. Mr. Traub stated that the current Band and Orchestra facility cannot accommodate the students they have and would like to know the impact this would have. Ms. Cappabianca noted that we need to consider the proposal for the housing complex at the East End and the potential impact on our student numbers. The Board would like the Administration to research our options in more detail for review. Ms. Clemons recommended conducting a Parent Survey to start the process to determine the desire of the community.

I. Policy no. 6042 (Student Use of Information Systems and Internet Safety)
